

Use-Case Flow Specification

Use Case: UC-03 – Book Consultation Slot

Preconditions

1. The patient is authenticated in the Telemedicine Slot Booking & Prescription Portal.
2. At least one physician and consultation slot is available.
3. The patient has access to the portal.

Postconditions

1. The selected consultation slot is successfully booked for the patient.
2. The booked slot is no longer available to other patients.
3. A secure consultation room is generated.
4. The patient and attending physician receive the consultation room link.
5. A booking confirmation is displayed to the patient.

Main Success Scenario

1. Patient selects the "Find a Doctor" option.
2. System displays available doctor specialties.
3. Patient selects a required medical specialty.
4. System displays physicians belonging to the selected specialty and their available consultation slots.
5. Patient selects an available consultation slot.
6. System validates that the selected slot is still available.
7. System confirms the booking and marks the selected slot as unavailable.
8. System generates a secure consultation room for the booked appointment.
9. System provides the encrypted consultation room link to the patient and attending physician.
10. System displays the booking confirmation to the patient.
11. Use case ends successfully.

Alternate Flow – Selected Slot Becomes Unavailable

6a. Selected slot is no longer available

1. System detects that the selected slot has already been booked by another patient.
2. System displays a message informing the patient that the selected slot is no longer available.
3. System displays the currently available slots for the selected physician.
4. Patient selects another available slot.
5. System validates and books the newly selected slot.
6. The use case continues from Step 7 of the Main Success Scenario.
